CHEMSTREAM AT INPRINT 2019

ChemStream had a successful INPRINT 2019 this year, with a brand new stand that attracted many interested parties.

The booth featured a selection of expertises such as:
nano-dispersion technology based on bio-based raw materials
'invisible' inks for tracking & tracing
flow chemistry
the product development process
3D inkjet printing of lenses and microreactors

For an overview of all topics you can click on the following [link](#).

We thank all visitors for their interest and appreciation for our approach.
